

ICT & Acceptable Use Policy

Written by	Richard Albert
Date ratified by the Governing Board	21 st November 2023
Published on	21 st November 2023
Review date (by)	September 2025

*Remember that I commanded you to be strong and brave.
So don't be afraid. The Lord your God will be with you
everywhere you go' (Joshua 1:9)*

As the harvest grows from the soil, Hayfield Cross came to life in 2015. From nothing, we have grown at the heart of our new community, persevering through challenge into a flourishing school. Guided by our Christian values the seeds of Joy, Integrity and Fellowship are planted as we instil this pioneering spirit in our children, challenging them through exciting learning to aspire to greatness in all that they do.

Hayfield Cross Church of England School

ICT & Acceptable Use Policy

“So whether you eat or drink or whatever you do, do it all for the glory of God.”

(Corinthians 10:31)

Introduction and Aims

Information and communications technology (ICT) is an integral part of the way our school works, and is a critical resource for children, staff (including the senior leadership team), governors, volunteers and visitors.

However, the ICT resources and facilities our school uses could also pose risks to data protection, online safety and safeguarding.

This policy aims to:

- Set guidelines and rules on the use of school ICT resources for staff, children, parents/carers and governors
- Establish clear expectations for the way all members of the school community engage with each other online
- Support the school’s policies on data protection, online safety and safeguarding
- Prevent disruption that could occur to the school through the misuse, or attempted misuse, of ICT systems
- Support the school in teaching children safe and effective internet and ICT use

This policy covers all users of our school’s ICT facilities, including governors, staff, children, volunteers, contractors and visitors.

Breaches of this policy may be dealt with under our Behaviour Policy and Staff Code of Conduct.

Relevant legislation and guidance

This policy refers to, and complies with, the following legislation and guidance:

- [Data Protection Act 2018](#)
- The UK General Data Protection Regulation (UK GDPR) – the EU GDPR was incorporated into UK legislation, with some amendments, by [The Data Protection, Privacy and Electronic Communications \(Amendments etc\) \(EU Exit\) Regulations 2020](#)
- [Computer Misuse Act 1990](#)
- [Human Rights Act 1998](#)
- [The Telecommunications \(Lawful Business Practice\) \(Interception of Communications\) Regulations 2000](#)
- [Education Act 2011](#)
- [Freedom of Information Act 2000](#)
- [Education and Inspections Act 2006](#)
- [Keeping Children Safe in Education 2023](#)
- [Searching, screening and confiscation: advice for schools 2022](#)
- [National Cyber Security Centre \(NCSC\): Cyber Security for Schools](#)
- [Education and Training \(Welfare of Children\) Act 2021](#)
- UK Council for Internet Safety (et al.) guidance on [sharing nudes and semi-nudes: advice for education settings working with children and young people](#)
- [Meeting digital and technology standards in schools and colleges](#)

Definitions

- **ICT facilities:** all facilities, systems and services including, but not limited to, network infrastructure, desktop computers, laptops, tablets, phones, music players or hardware, software, websites, web applications or services, and any device system or service that may become available in the future which is provided as part of the school's ICT service
- **Users:** anyone authorised by the school to use the school's ICT facilities, including governors, staff, children, volunteers, contractors and visitors
- **Personal use:** any use or activity not directly related to the users' employment, study or purpose agreed by an authorised user
- **Authorised personnel:** employees authorised by the school to perform systems administration and/or monitoring of the ICT facilities
- **Materials:** files and data created using the school's ICT facilities including but not limited to documents, photos, audio, video, printed output, web pages, social networking sites and blogs

See appendix 6 for a glossary of cyber security terminology.

Unacceptable use

The following is considered unacceptable use of the school's ICT facilities. Any breach of this policy may result in disciplinary or behaviour proceedings (see section 4.2 below).

Unacceptable use of the school's ICT facilities includes:

- Using the school's ICT facilities to breach intellectual property rights or copyright
- Using the school's ICT facilities to bully or harass someone else, or to promote unlawful discrimination
- Breaching the school's policies or procedures
- Any illegal conduct, or statements which are deemed to be advocating illegal activity
- Online gambling, inappropriate advertising, phishing and/or financial scams
- Accessing, creating, storing, linking to or sending material that is pornographic, offensive, obscene or otherwise inappropriate or harmful
- Consensual and non-consensual sharing of nude and semi-nude images and/or videos and/or livestreams
- Activity which defames or disparages the school, or risks bringing the school into disrepute
- Sharing confidential information about the school, its children, or other members of the school community
- Connecting any device to the school's ICT network without approval from authorised personnel
- Setting up any software, applications or web services on the school's network without approval by authorised personnel, or creating or using any programme, tool or item of software designed to interfere with the functioning of the school's ICT facilities, accounts or data
- Gaining, or attempting to gain, access to restricted areas of the network, or to any password-protected information, without approval from authorised personnel
- Allowing, encouraging or enabling others to gain (or attempt to gain) unauthorised access to the school's ICT facilities
- Causing intentional damage to the school's ICT facilities

- Removing, deleting or disposing of the school's ICT equipment, systems, programmes or information without permission from authorised personnel
- Causing a data breach by accessing, modifying, or sharing data (including personal data) to which a user is not permitted by authorised personnel to have access, or without authorisation
- Using inappropriate or offensive language
- Promoting a private business, unless that business is directly related to the school
- Using websites or mechanisms to bypass the school's filtering or monitoring mechanisms
- Engaging in content or conduct that is radicalised, extremist, racist, antisemitic or discriminatory in any other way
- Using AI tools and generative chatbots (such as ChatGPT and Google Bard):
 - During assessments, including internal and external assessments
 - To write their homework or class assignments, where AI-generated text or imagery is presented as their own work

This is not an exhaustive list. The school reserves the right to amend this list at any time.

The Headteacher will use their professional judgement to determine whether any act or behaviour not on the list above is considered unacceptable use of the school's ICT facilities.

Exceptions from unacceptable use

Where the use of school ICT facilities (on the school premises and/or remotely) is required for a purpose that would otherwise be considered an unacceptable use, exemptions to the policy may be granted at the headteacher's discretion.

- Children may use AI tools and generative chatbots:
 - As a research tool to help them find out about new topics and ideas
 - When specifically studying and discussing AI in schoolwork, for example in IT lessons or art homework about AI-generated images. All AI-generated content must be properly attributed

Sanctions

Children and staff who engage in any of the unacceptable activities listed above may face disciplinary action in line with the school's policies on Behaviour and Staff code of conduct, etc.

Unacceptable ICT use may lead to a revoking permission to use the school's systems, for example.

Staff (including governors, volunteers, and contractors)

Access to school ICT facilities and materials

The school's Network Manager (Intern ICT) manages access to the school's ICT facilities and materials for school staff. That includes, but is not limited to:

- Computers, tablets, mobile phones and other devices
- Access permissions for certain programmes or files

Staff will be provided with unique login/account information and passwords that they must use when accessing the school's ICT facilities.

Staff who have access to files that they are not authorised to view or edit, or who need their access permissions updated or changed, should contact the Network Manager or School Business Manager.

Use of phones and email

The school provides each member of staff with an email address.

This email account should be used for work purposes only. Staff should enable multi-factor authentication on their email account(s).

All work-related business should be conducted using the email address the school has provided.

Staff must not share their personal email addresses with parents/carers and children, and must not send any work-related materials using their personal email account.

Staff must take care with the content of all email messages, as incorrect or improper statements can give rise to claims for discrimination, harassment, defamation, breach of confidentiality or breach of contract.

Email messages are required to be disclosed in legal proceedings or in response to requests from individuals under the Data Protection Act 2018 in the same way as paper documents. Deletion from a user's inbox does not mean that an email cannot be recovered for the purposes of disclosure. All email messages should be treated as potentially retrievable.

Staff must take extra care when sending sensitive or confidential information by email. Any attachments containing sensitive or confidential information should be encrypted so that the information is only accessible by the intended recipient.

If staff receive an email in error, the sender should be informed and the email deleted. If the email contains sensitive or confidential information, the user must not make use of that information or disclose that information.

If staff send an email in error that contains the personal information of another person, they must inform the Network Manager or School Business Manager immediately and follow our data breach procedure.

Staff must not give their personal phone number(s) to parents/carers or children. Staff must use phones provided by the school to conduct all work-related business.

School phones must not be used for personal matters.

Staff who are provided with mobile phones as equipment for their role must abide by the same rules for ICT acceptable use as set out in section 4.

Personal use

Staff are permitted to occasionally use school ICT facilities for personal use, subject to certain conditions set out below. This permission must not be overused or abused. The Network Manager or School Business Manager may withdraw or restrict this permission at any time and at their discretion.

Personal use is permitted provided that such use:

- Does not take place during contact time/teaching hours
- Does not constitute 'unacceptable use', as defined in section 4
- Takes place when no children are present
- Does not interfere with their jobs, or prevent other staff or children from using the facilities for work or educational purposes

Staff may not use the school's ICT facilities to store personal, non-work-related information or materials (such as music, videos or photos).

Staff should be aware that use of the school's ICT facilities for personal use may put personal communications within the scope of the school's ICT monitoring activities (see section 5.5). Where breaches of this policy are found, disciplinary action may be taken.

Staff are also permitted to use their personal devices (such as mobile phones or tablets) in line with the school's Mobile Phone & Smart Devices Policy.

Staff should be aware that personal use of ICT (even when not using school ICT facilities) can impact on their employment by, for instance, putting personal details in the public domain, where children and parents/carers could see them.

Staff should take care to follow the school's guidelines on use of social media (see appendix 1) and use of email (see above section) to protect themselves online and avoid compromising their professional integrity.

Personal social media accounts

Members of staff should make sure their use of social media, either for work or personal purposes, is appropriate at all times.

The school has guidelines for staff on appropriate security settings for Facebook accounts (see appendix 1).

School social media accounts

The school has an official Facebook account, managed by the School Office, and X/Twitter accounts, the Headteacher and Class Teachers. Staff members who have not been authorised to manage, or post to, the account, must not access, or attempt to access, the account.

The school has guidelines for what may and must not be posted on its social media accounts. Those who are authorised to manage, or post to, the account must make sure they abide by these guidelines at all times.

Monitoring and filtering of the school network and use of ICT facilities

To safeguard and promote the welfare of children and provide them with a safe environment to learn, the school reserves the right to filter and monitor the use of its ICT facilities and network. This includes, but is not limited to, the filtering and monitoring of:

- Internet sites visited
- Bandwidth usage
- Email accounts
- Telephone calls
- User activity/access logs
- Any other electronic communications

Only authorised ICT personnel may filter, inspect, monitor, intercept, assess, record and disclose the above, to the extent permitted by law.

The school monitors ICT use in order to:

- Obtain information related to school business
- Investigate compliance with school policies, procedures and standards
- Ensure effective school and ICT operation
- Conduct training or quality control exercises
- Prevent or detect crime
- Comply with a subject access request, Freedom of Information Act request, or any other legal obligation

Our governing board is responsible for making sure that:

- The school meets the DfE's [filtering and monitoring standards](#)
- Appropriate filtering and monitoring systems are in place
- Staff are aware of those systems and trained in their related roles and responsibilities

- For the leadership team and relevant staff, this will include how to manage the processes and systems effectively and how to escalate concerns
- It regularly reviews the effectiveness of the school's monitoring and filtering systems

The school's designated safeguarding lead (DSL) will take lead responsibility for understanding the filtering and monitoring systems and processes in place.

Where appropriate, staff may raise concerns about monitored activity with the school's DSL and Network manager, as appropriate.

Children

Access to ICT facilities

- Computers and equipment are available to children only under the supervision of staff
- Specialist ICT equipment, such as that used for music, or design and technology, must only be used under the supervision of staff

Search and deletion

Under the Education Act 2011, the headteacher, and any member of staff authorised to do so by the headteacher, can search children and confiscate their mobile phones, computers or other devices that the authorised staff member has reasonable grounds for suspecting:

- Poses a risk to staff or children, **and/or**
- Is identified in the school rules as a banned item for which a search can be carried out, **and/or**
- Is evidence in relation to an offence

This includes, but is not limited to:

- Pornography
- Abusive messages, images or videos
- Indecent images of children
- Evidence of suspected criminal behaviour (such as threats of violence or assault)

Before a search, if the authorised staff member is satisfied that they have reasonable grounds for suspecting any of the above, they will also:

- Make an assessment of how urgent the search is, and consider the risk to other children and staff. If the search is not urgent, they will seek advice from the Headteacher, a member of SLT or one of the DSLs
- Explain to the children why they are being searched, and how and where the search will happen, and give them the opportunity to ask questions about it
- Seek the children's co-operation (if the children refuses to co-operate, you should proceed according to your behaviour policy)

The authorised staff member should:

- Inform the DSL (or deputy) of any searching incidents where they had reasonable grounds to suspect a children was in possession of a banned item.
- Involve the DSL (or deputy) without delay if they believe that a search has revealed a safeguarding risk

Authorised staff members may examine, and in exceptional circumstances erase, any data or files on a device that they have confiscated where they believe there is a 'good reason' to do so.

When deciding whether there is a 'good reason' to examine data or files on a device, the staff member should only do so if they reasonably suspect that the data has been, or could be, used to:

- Cause harm, **and/or**
- Undermine the safe environment of the school or disrupt teaching, **and/or**
- Commit an offence

If inappropriate material is found on the device, it is up to the staff member in conjunction with the DSL / Headteacher / other member of the senior leadership team to decide on a suitable response. If there are images, data or files on the device that staff reasonably suspect are likely to put a person at risk, they will first consider the appropriate safeguarding response.

When deciding whether there is a good reason to erase data or files from a device, staff members will consider whether the material may constitute evidence relating to a suspected offence. In these instances, they will not delete the material, and the device will be handed to the police as soon as is reasonably practicable. If the material is not suspected to be evidence in relation to an offence, staff members may delete it if:

- They reasonably suspect that its continued existence is likely to cause harm to any person, **and/or**
- The children and/or the parent refuses to delete the material themselves

If a staff member **suspects** a device **may** contain an indecent image of a child (also known as a nude or semi-nude image), they will:

- **Not** view the image
- **Not** copy, print, share, store or save the image
- Confiscate the device and report the incident to the DSL (or deputy) immediately, who will decide what to do next. The DSL will make the decision in line with the DfE's latest guidance on [searching, screening and confiscation](#) and the UK Council for Internet Safety (UKCIS) et al.'s guidance on [sharing nudes and semi-nudes: advice for education settings working with children and young people](#)

Any searching of children will be carried out in line with:

- The DfE's latest guidance on [searching, screening and confiscation](#)
- UKCIS et al.'s guidance on [sharing nudes and semi-nudes: advice for education settings working with children and young people](#)
- Our behaviour policy / searches and confiscation policy

Any complaints about searching for, or deleting, inappropriate images or files on children's devices will be dealt with through the school complaints procedure.

Unacceptable use of ICT and the internet outside of school

The school will sanction children, in line with the Behaviour Policy, if a child engages in any of the following **at any time** (even if they are not on school premises):

- Using ICT or the internet to breach intellectual property rights or copyright
- Using ICT or the internet to bully or harass someone else, or to promote unlawful discrimination
- Breaching the school's policies or procedures
- Any illegal conduct, or making statements which are deemed to be advocating illegal activity
- Accessing, creating, storing, linking to or sending material that is pornographic, offensive, obscene or otherwise inappropriate
- Consensual or non-consensual sharing of nude and semi-nude images and/or videos and/or livestreams (also known as sexting or youth produced sexual imagery)
- Activity which defames or disparages the school, or risks bringing the school into disrepute

- Sharing confidential information about the school, other children, or other members of the school community
- Gaining or attempting to gain access to restricted areas of the network, or to any password-protected information, without approval from authorised personnel
- Allowing, encouraging, or enabling others to gain (or attempt to gain) unauthorised access to the school's ICT facilities
- Causing intentional damage to the school's ICT facilities or materials
- Causing a data breach by accessing, modifying, or sharing data (including personal data) to which a user and/or those they share it with are not supposed to have access, or without authorisation
- Using inappropriate or offensive language

Parents/carers

Access to ICT facilities and materials

Parents/carers do not have access to the school's ICT facilities as a matter of course.

However, parents/carers working for, or with, the school in an official capacity (for instance, as a volunteer or as a member of the PTA) may be granted an appropriate level of access, or be permitted to use the school's facilities at the headteacher's discretion.

Where parents/carers are granted access in this way, they must abide by this policy as it applies to staff.

Communicating with or about the school online

We believe it is important to model for children, and help them learn, how to communicate respectfully with, and about, others online.

Parents/carers play a vital role in helping model this behaviour for their children, especially when communicating with the school through our website and social media channels.

We ask parents/carers to sign the agreement in appendix 2.

Communicating with parents/carers about children activity

In line with other curriculum updates, school will ensure that parents and carers are made aware of any online activity that their children may be asked to carry out.

In particular, staff will let parents/carers know which (if any) person or people from the school children will be interacting with online, including the purpose of the interaction. Parents/carers may seek any support and advice from the school to ensure a safe online environment is established for their child.

Data security

The school is responsible for making sure it has the appropriate level of security protection and procedures in place to safeguard its systems, staff and learners. It therefore takes steps to protect the security of its computing resources, data and user accounts. The effectiveness of these procedures is reviewed periodically to keep up with evolving cyber crime technologies.

Staff, children, parents/carers and others who use the school's ICT facilities should use safe computing practices at all times. We aim to meet the cyber security standards recommended by the Department for Education's guidance on [digital and technology standards in schools and colleges](#), including the use of:

- Firewalls
- Security features

- User authentication and multi-factor authentication
- Anti-malware software

Passwords

All users of the school's ICT facilities should set strong passwords for their accounts and keep these passwords secure. Users are responsible for the security of their passwords and accounts, and for setting permissions for accounts and files they control.

Members of staff or children who disclose account or password information may face disciplinary action. Parents, visitors or volunteers who disclose account or password information may have their access rights revoked.

Software updates, firewalls and anti-virus software

All of the school's ICT devices that support software updates, security updates and anti-virus products will have these installed, and be configured to perform such updates regularly or automatically.

Users must not circumvent or make any attempt to circumvent the administrative, physical and technical safeguards we implement and maintain to protect personal data and the school's ICT facilities.

Any personal devices using the school's network must all be configured in this way.

Data protection

All personal data must be processed and stored in line with data protection regulations and the school's data protection policy. These can be found on our school website.

Access to facilities and materials

All users of the school's ICT facilities will have clearly defined access rights to school systems, files and devices. These access rights are managed by the Network Manager, School Business Manager or Headteacher

Users should not access, or attempt to access, systems, files or devices to which they have not been granted access. If access is provided in error, or if something a user should not have access to is shared with them, they should alert the Network Manager immediately.

Users should always log out of systems and lock their equipment when they are not in use to avoid any unauthorised access. Equipment and systems should always be logged out of and shut down completely at the end of each working day.

Encryption

The school makes sure that its devices and systems have an appropriate level of encryption.

School staff may only use personal devices (including computers and USB drives) to access school data, work remotely, or take personal data (such as children information) out of school if they have been specifically authorised to do so by the headteacher.

Use of such personal devices will only be authorised if the devices have appropriate levels of security and encryption.

Protection from cyber attacks

Please see the glossary (appendix 6) to help you understand cyber security terminology.

The school will:

- Work with governors and the IT department to make sure cyber security is given the time and resources it needs to make the school secure

- Provide annual training for staff (and include this training in any induction for new starters, if they join outside of the school's annual training window) on the basics of cyber security, including how to:
 - Check the sender address in an email
 - Respond to a request for bank details, personal information or login details
 - Verify requests for payments or changes to information
- Make sure staff are aware of its procedures for reporting and responding to cyber security incidents
- Investigate whether our IT software needs updating or replacing to be more secure
- Not engage in ransom requests from ransomware attacks, as this would not guarantee recovery of data
- Put controls in place that are:
 - **Proportionate:** the school will verify this using a third-party audit (such as [360 degree safe](#)), to objectively test that what it has in place is effective
 - **Multi-layered:** everyone will be clear on what to look out for to keep our systems safe
 - **Up to date:** with a system in place to monitor when the school needs to update its software
 - **Regularly reviewed and tested:** to make sure the systems are as effective and secure as they can be
- Back up critical data and store these backups on cloud-based backup systems and external hard drives that aren't connected to the school network and which can be stored off the school premises.
- Delegate specific responsibility for maintaining the security of our management information system (MIS) to our cloud-based provider.
- Make sure staff:
 - Enable multi-factor authentication where they can, on things like school email accounts
 - Store passwords securely using a password manager
- Make sure ICT staff conduct regular access reviews to make sure each user in the school has the right level of permissions and admin rights
- Have a firewall in place that is switched on
- Check that its supply chain is secure, for example by asking suppliers about how secure their business practices are and checking if they have the [Cyber Essentials](#) certification
- Develop, review and test an incident response plan, for example, how the school will communicate with everyone if communications go down, who will be contacted and when, and who will notify [Action Fraud](#) of the incident. This plan will be reviewed and tested and after a significant event has occurred, using the NCSC's '[Exercise in a Box](#)'
- Work with our local authority (North Northamptonshire Council) to see what it can offer the school regarding cyber security, such as advice on which service providers to use or assistance with procurement

Internet access

The school's wireless internet connection is secure. We have a robust filtering system in place that alerts the Designated Safeguarding Leads and Network Manager if identified phrases and terms are input. Staff make the Network Manager aware when they identify URLs or website which they would like to prohibit the children from accessing.

Children

We are fortunate that our school site has both wired and wireless internet access with is accessible via a password protected network. This password is only shared with staff and not children or parents.

Parents/carers and visitors

Parents/carers and visitors to the school will not be permitted to use the school's WiFi unless specific authorisation is granted by the headteacher.

The headteacher will only grant authorisation if:

- Parents/carers are working with the school in an official capacity (e.g. as a volunteer or as a member of the PTA)
- Visitors need to access the school's WiFi in order to fulfil the purpose of their visit (for instance, to access materials stored on personal devices as part of a presentation or lesson plan). In this instance, visitors are given access to a 'guest' network.

Staff must not give the WiFi password to anyone who is not authorised to have it. Doing so could result in disciplinary action.

Monitoring and review

The Headteacher, Computing Lead, Designated Safeguarding Leads and School Business Manager will monitor the implementation of this policy, including ensuring it is updated to reflect the needs and circumstances of the school.

This policy will be reviewed every year.

The governing board is responsible for approving this policy.

Related policies

This policy should be read alongside the school's policies including:

- Online safety
- Safeguarding and child protection
- Behaviour
- GDPR
- Remote education
- Mobile Phone & Smart Devices

DO NOT ACCEPT FRIEND REQUESTS FROM PUPILS ON SOCIAL MEDIA

10 rules for school staff on Facebook

1. Change your display name – use your first and middle name, use a maiden name, or put your surname backwards instead
2. Change your profile picture to something unidentifiable, or if you don't, make sure that the image is professional
3. Check your privacy settings regularly
4. Be careful about tagging other staff members in images or posts
5. Don't share anything publicly that you wouldn't be happy showing your pupils
6. Don't use social media sites during school hours
7. Don't make comments about your job, your colleagues, our school or your pupils online – once it's out there, it's out there
8. Don't associate yourself with the school on your profile (e.g. by setting it as your workplace, or by 'checking in' at a school event)
9. Don't link your work email address to your social media accounts. Anyone who has this address (or your personal email address/mobile number) is able to find you using this information
10. Consider uninstalling the Facebook app from your phone. The app recognises WiFi connections and makes friend suggestions based on who else uses the same WiFi connection (such as parents or pupils)

Check your privacy settings

- > Change the visibility of your posts and photos to '**Friends only**', rather than 'Friends of friends'. Otherwise, pupils and their families may still be able to read your posts, see things you've shared and look at your pictures if they're friends with anybody on your contacts list
- > Don't forget to check your **old posts and photos** – go to [bit.ly/2MdQXMN](https://www.facebook.com/privacy/checkyourposts) to find out how to limit the visibility of previous posts
- > The public may still be able to see posts you've '**liked**', even if your profile settings are private, because this depends on the privacy settings of the original poster
- > **Google your name** to see what information about you is visible to the public
- > Prevent search engines from indexing your profile so that people can't **search for you by name** – go to [bit.ly/2z4MdVht](https://www.facebook.com/privacy/visibility) to find out how to do this
- > Remember that **some information is always public**: your display name, profile picture, cover photo, user ID (in the URL for your profile), country, age range and gender

What to do if ...

A pupil adds you on social media

- > In the first instance, ignore and delete the request. Block the pupil from viewing your profile
- > Check your privacy settings again, and consider changing your display name or profile picture
- > If the pupil asks you about the friend request in person, tell them that you're not allowed to accept friend requests from pupils and that if they persist, you'll have to notify senior leadership and/or their parents/carers. If the pupil persists, take a screenshot of their request and any accompanying messages
- > Notify the senior leadership team or the headteacher about what's happening

A parent/carer adds you on social media

- > It is at your discretion whether to respond. Bear in mind that:
 - Responding to 1 parent/carer's friend request or message might set an unwelcome precedent for both you and other teachers at the school
 - Pupils may then have indirect access through their parent/carer's account to anything you post, share, comment on or are tagged in
- > If you wish to decline the offer or ignore the message, consider drafting a stock response to let the parent/carer know that you're doing so

You're being harassed on social media, or somebody is spreading something offensive about you

- > **Do not** retaliate or respond in any way
- > Save evidence of any abuse by taking screenshots and recording the time and date it occurred
- > Report the material to Facebook or the relevant social network and ask them to remove it
- > If the perpetrator is a current pupil or staff member, our mediation and disciplinary procedures are usually sufficient to deal with online incidents
- > If the perpetrator is a parent/carer or other external adult, a senior member of staff should invite them to a meeting to address any reasonable concerns or complaints and/or request they remove the offending comments or material
- > If the comments are racist, sexist, of a sexual nature or constitute a hate crime, you or a senior leader should consider contacting the police

Appendix 2: Acceptable use of the internet: agreement for parents and carers

Acceptable use of the internet: agreement for parents and carers

Name of parent/carers:

Name of child:

Online channels are an important way for parents/carers to communicate with, or about, our school.

The school uses the following channels:

- Our official Facebook page
- Our official X/Twitter pages
- Email/text groups for parents (for school announcements and information)
- Our virtual learning platform

Parents/carers may also set up independent channels to help them stay on top of what's happening in their child's class. For example, class/year Facebook groups, email groups, or chats (through apps such as WhatsApp). These are not official communication channels.

When communicating with the school via official communication channels, or using private/independent channels to talk about the school, I will:

- Be respectful towards members of staff, and the school, at all times
- Be respectful of other parents/carers and children
- Direct any complaints or concerns through the school's official channels, so they can be dealt with in line with the school's complaints procedure

I will not:

- Use private groups, the school's Facebook page, or personal social media to complain about or criticise members of staff. This is not constructive and the school can't improve or address issues unless they are raised in an appropriate way
- Use private groups, the school's Facebook page, or personal social media to complain about, or try to resolve, a behaviour issue involving other children. I will contact the school and speak to the appropriate member of staff if I'm aware of a specific behaviour issue or incident
- Upload or share photos or videos on social media of any child other than my own, unless I have the permission of the other children's parents/carers

Signed:

Date:

Appendix 3: Acceptable use agreement for children

**Acceptable use of the school’s ICT facilities and internet:
agreement for children and parents/carers**

Name of children:

When I use the school’s ICT facilities (like computers and equipment) and go on the internet in school, I will not:

- Use them without asking a teacher first, or without a teacher in the room with me
- Use them to break school rules
- Go on any inappropriate websites
- Go on Facebook or other social networking sites (unless my teacher said I could as part of a lesson)
- Use chat rooms
- Open any attachments in emails, or click any links in emails, without checking with a teacher first
- Use mean or rude language when talking to other people online or in emails
- Send any photos, videos or livestreams of people (including me) who aren’t wearing all of their clothes
- Share my password with others or log in using someone else’s name or password
- Bully other people
- Use artificial intelligence (AI) chatbots, such as ChatGPT or Google Bard, to create images or write for me, and then submit it as my own work

I understand that the school will check the websites I visit and how I use the school’s computers and equipment. This is so that they can help keep me safe and make sure I’m following the rules.

I will tell a teacher or a member of staff I know immediately if I find anything on a school computer or online that upsets me, or that I know is mean or wrong.

I will always be responsible when I use the school’s ICT systems and internet.

I understand that the school can discipline me if I do certain unacceptable things online, even if I’m not in school when I do them.

Signed (children):

Date:

Parent/carer agreement: I agree that my child can use the school’s ICT systems and internet when appropriately supervised by a member of school staff. I agree to the conditions set out above for childrens using the school’s ICT systems and internet, and for using personal electronic devices in school, and will make sure my child understands these.

Signed (parent/carer):

Date:

Appendix 4: Acceptable use agreement for staff, governors, volunteers and visitors

**Acceptable use of the school’s ICT facilities and the internet:
agreement for staff, governors, volunteers and visitors**

Name of staff member/governor/volunteer/visitor:

When using the school’s ICT facilities and accessing the internet in school, or outside school on a work device, I will not:

- Access, or attempt to access inappropriate material, including but not limited to material of a violent, criminal or pornographic nature (or create, share, link to or send such material)
- Use them in any way which could harm the school’s reputation
- Access social networking sites or chat rooms
- Use any improper language when communicating online, including in emails or other messaging services
- Install any unauthorised software, or connect unauthorised hardware or devices to the school’s network
- Share my password with others or log in to the school’s network using someone else’s details
- Share confidential information about the school, its children or staff, or other members of the community
- Access, modify or share data I’m not authorised to access, modify or share
- Promote any private business, unless that business is directly related to the school

I understand that the school will monitor the websites I visit and my use of the school’s ICT facilities and systems.

I will take all reasonable steps to ensure that work devices are secure and password-protected when using them outside school, and keep all data securely stored in accordance with this policy and the school’s data protection policy.

I will let the designated safeguarding lead (DSL) and ICT manager know if a children informs me they have found any material which might upset, distress or harm them or others, and will also do so if I encounter any such material.

I will always use the school’s ICT systems and internet responsibly, and ensure that children in my care do so too.

Signed (staff member/governor/volunteer/visitor):

Appendix 5: Glossary of cyber security terminology

These key terms will help you to understand the common forms of cyber attack and the measures the school will put in place. They're from the National Cyber Security Centre (NCSC) [glossary](#).

TERM	DEFINITION
Antivirus	Software designed to detect, stop and remove malicious software and viruses.
Breach	When your data, systems or networks are accessed or changed in a non-authorised way.
Cloud	Where you can store and access your resources (including data and software) via the internet, instead of locally on physical devices.
Cyber attack	An attempt to access, damage or disrupt your computer systems, networks or devices maliciously.
Cyber incident	Where the security of your system or service has been breached.
Cyber security	The protection of your devices, services and networks (and the information they contain) from theft or damage.
Download attack	Where malicious software or a virus is downloaded unintentionally onto a device without the user's knowledge or consent.
Firewall	Hardware or software that uses a defined rule set to constrain network traffic – this is to prevent unauthorised access to or from a network.
Hacker	Someone with some computer skills who uses them to break into computers, systems and networks.
Malware	Malicious software. This includes viruses, trojans or any code or content that can adversely impact individuals or organisations.
Patching	Updating firmware or software to improve security and/or enhance functionality.
Pentest	Short for penetration test. This is an authorised test of a computer network or system to look for security weaknesses.

Pharming	An attack on your computer network that means users are redirected to a wrong or illegitimate website even if they type in the right website address.
Phishing	Untargeted, mass emails sent to many people asking for sensitive information (such as bank details) or encouraging them to visit a fake website.
Ransomware	Malicious software that stops you from using your data or systems until you make a payment.
Social engineering	Manipulating people into giving information or carrying out specific actions that an attacker can use.
Spear-phishing	A more targeted form of phishing where an email is designed to look like it's from a person the recipient knows and/or trusts.
Trojan	A type of malware/virus designed to look like legitimate software that can be used to hack a victim's computer.
Two-factor/multi-factor authentication	Using 2 or more different components to verify a user's identity.
Virus	Programmes designed to self-replicate and infect legitimate software programs or systems.
Virtual private network (VPN)	An encrypted network which allows remote users to connect securely.
Whaling	Highly- targeted phishing attacks (where emails are made to look legitimate) aimed at senior people in an organisation.

Interm IT - Partnership Document with Hayfield Cross Church of England School

Digital and Technology standards in schools and colleges March 2023

In this document we clarify the key responsibilities that fall to governing bodies and leadership teams under the March 23 guidance from the DfE and identify the support and expertise that Interm IT provides for our schools as we work together to ensure the safeguarding of young people. We ask that you **complete or correct** any school information and ensure that the relevant staff and governors have sight of the completed document which should be available for inspection when required.

All governing bodies and leadership teams should be fully aware of, and be putting into practice, the statutory guidance in KSCIE 22/23; appreciating the role of all parties in ensuring online safety is firmly embedded as a safeguarding issue.

The March 23 guidance from the DfE offers more clarity around roles and responsibilities in relation to digital and technology standards in schools and in particular to filtering and monitoring. This area is likely to come under significant scrutiny in Ofsted inspections going forward.

The guidance identifies 4 filtering and monitoring standards:

Standard 1

You should identify and assign roles and responsibilities to manage your filtering and monitoring systems

Governing bodies have overall strategic responsibility for filtering and monitoring and need to be assured that these standards are being met. Schools should identify and assign a member of the school leadership team and a governor to be responsible for ensuring these standards are met. There must be clarity over the roles and responsibilities of staff and third-party providers including Interm IT.

The assigned member of the school's senior team is Richard Albert, Headteacher

They will fulfill their responsibility by ensuring that they report Half termly to the governing body, lead item on inset day, staff meetings, check that filtering and monitoring is working

The nominated governor is Simon Hurrell.

They will ensure that the standards are being met and will report to the governing body termly .

Governor understands how it is done and that it is working.

Standard 2

You should review your filtering and monitoring provision at least annually

As part of their routine annual appointment to review the contract with each school Interm IT will, working with the school, ensure that the documentation that the school holds regarding its filtering and monitoring systems is both accurate and technically sound. Interm IT will use their technical expertise, and their knowledge of industry trends and technological advances, to advise school leaders on whether their provision remains best value and whether within the financial restraints of the school, it still delivers best practice in this area - thus enabling the school to justify its procurement decisions. Any change to the system set up will have an impact on the decisions made, for example the use of school owned devices off site, and the impact of this will be reflected on during the review. In addition, a discussion around roles and responsibilities is essential at least annually to ensure that Interm's staff are working effectively with the school staff so that there can be no slippage in either filtering or monitoring. The results of the annual review must be retained by the school and be available for inspection.

Our annual review takes place at an agreed date which will be agreed between Interm and the school.

The school staff attending will be Headteacher, Deputy Headteacher, Lead Family Support Worker and the School Business Manager

Standard 3

Your filtering system should block harmful and inappropriate content, without unreasonably impacting teaching and learning

Again, as part of the annual meeting Interm will advise the school on how to ensure that filtering does not impact teaching and learning whilst at the same time enables the school to meet its statutory requirements in KCSIE and Prevent duty. Schools must give thought as to how to enable students to assess and manage risk themselves. The Interm staff on site will also be able to provide real time support in this area as the need arises throughout the school year.

The school filtering system is hosted by NET SWEEPER and utilises the Schools Broadband software/system.

Standard 4

You should have effective monitoring strategies that meet the safeguarding needs of your school.

Monitoring user activity on school devices is an essential part of providing a safe environment for students and staff. Unlike filtering, it does not stop users from accessing material, but it allows the school to review user activity on school devices. For monitoring to be effective it must pick up incidents urgently, allowing prompt action to be taken and outcomes to be recorded.

Again, a clear staff responsibility structure is key as are delineated procedures. The specialist knowledge of both safeguarding and IT staff is required to enable the management of technical monitoring systems.

Interm partner with a market leader provider of effective monitoring software but we can work with any provider chosen by the school. We will be able to ensure that the key staff have appropriate training and given our experience across a range of schools we will guide and advise on good practice in this area.

The monitoring software used is SENSO.

The alerts are directed to Headteacher from Interm IT and to the Deputy Headteacher and DSL Team; in their absence the alerts will be sent to the Family Support Worker.
